Why SPC Flooring

The Future of Flooring

The Anatomy of SPC Flooring

Wear Layer

Wear layer serves as a shield for the plank. A wear layer, in essence, ensures that wear and tear do not have an impact on your floor.

UV Coating

It acts as an anti-pollution barrier and absorbs ultraviolet radiation effectively, improving wear resistance, delaying product ageing, and making cleaning easier.

SPC Core Sheet

This is the plank's solid, waterproof core, which is comprised of natural limestone powder, polyvinyl chloride, and stabilisers. It gives stiffness and stability to the plank.

Decor Film

This quality Vinyl image layer provides a wooden-like appearance to your flooring, making it more opulent and authentic.

Underlayment

The underlayment absorbs sound, maintains warmth, and provides cushioning comfort. A denser layer provides better noise absorption and shock absorption.

SPC Flooring Applications

Bedroom

Livingroom

Bathroom

Kitchen

Office

Airport

Hospital

Restaurant

Movie Theatre

Shopping Centre
